

ANDRE GOTTGTROY

Game Designer

Auckland, New Zealand | [LinkedIn](#) | [Portfolio](#) | andregot@gmail.com

PROFESSIONAL SUMMARY

Game Designer with 6+ years of professional experience designing gameplay systems, progression systems, technical features, content, quests, and player experiences across live and in-development projects. Combines strong systems design expertise with leadership, mentoring, creative direction, and cross-disciplinary collaboration. Experienced working in Unreal Engine, Unity, and proprietary technology, bridging design and engineering to rapidly prototype and deliver player-focused experiences.

CORE COMPETENCIES

- Gameplay Systems Design
- Combat & Progression Design
- Quest Design & Content Design
- Technical Design & Scripting
- Creative Direction & Vision Alignment
- Worldbuilding & Narrative Collaboration
- Prototyping & R&D
- Unreal Engine & Blueprints
- Cross-Discipline Leadership & Collaboration
- Mentorship & Team Development
- Documentation & Communication
- Original IP Development

PROFESSIONAL EXPERIENCE

*MYTONA – Intermediate Game Designer / Deputy Producer / NZ Design Lead
(2021–2026)*

- Designed gameplay systems, progression systems, meta systems, quests, technical features, and player-facing content across multiple projects.
- Owned feature vision from concept through implementation, creating detailed design documentation, specifications, user flows, and implementation plans.
- Collaborated closely with engineering, art, audio, QA, production, and leadership teams to ensure cohesive player experiences.

- Contributed to creative direction and feature strategy, helping align gameplay goals with player motivations and project objectives.
- Served as Deputy Producer responsible for coordinating art, design, and audio disciplines while supporting project planning and delivery.
- Led and mentored designers and interns, establishing the New Zealand internship programme and supporting career development within the team.
- Participated in hiring, onboarding, and design team growth initiatives.
- Pitched gameplay systems, features, and product ideas directly to producers and executive stakeholders.
- Worked extensively in R&D and prototyping environments, evaluating new gameplay opportunities, mechanics, and original concepts.
- Acted as a bridge between creative and technical disciplines, leveraging a software engineering background to improve communication and implementation.

MYTONA – Junior Game Designer (2020–2021)

- Created gameplay documentation, feature specifications, gameplay loops, and systems flows.
- Supported gameplay prototyping, iteration, and early-stage feature development.
- Collaborated with multidisciplinary teams to deliver player-facing content and gameplay systems.
- Contributed to the design vision and implementation of experimental gameplay concepts.

VISTIC – Graduate Software Engineer (2019–2020)

- Developed and maintained production software features using C# and .NET.
- Worked within agile teams delivering technical solutions, testing, maintenance, and customer support.

SELECTED ACHIEVEMENTS

- Designed a feature for Cooking Diary recognised as a finalist in the Game Refinery Mobile GameDev Awards 2022 for Feature Innovation.
- Presented at the New Zealand Game Developers Conference.
- Judge for the Pavs New Zealand Game Awards.
- Represented the company at industry events including Spark Game Arena.
- Built and led the New Zealand internship programme, mentoring multiple designers and helping establish local design team growth.

ADDITIONAL RELEVANT EXPERIENCE

Personal Game Development & Worldbuilding

- Long-term exploration of trading card game design involving original settings, faction identities, progression mechanics, resource systems, and narrative integration.
- Deep personal interest in action RPGs, fantasy RPGs, roguelites, tabletop RPGs, strategy games, mythology, and historical worldbuilding.

TOOLS & TECHNOLOGIES

- **ENGINE & SCRIPTING:** Unreal Engine / Blueprints, Unity, Proprietary Engines, C, C++, C#, Lua, Python, JavaScript
- **DESIGN & DEVELOPMENT:** GitHub, Bitbucket, Figma, Adobe Suite, Miro, Confluence, Jira, Wrike, Trello, HacknPlan

EDUCATION

- Bachelor of Software Engineering – Media Design School, Auckland (A-)
- Diploma in Digital Creativity – Media Design School, Auckland (Merit)
- IBM Data Science Professional Certificate
