

ANDRE GOTTGTROY

Game Designer

Auckland, New Zealand | Open to relocation | [LinkedIn](#) | [Portfolio](#) | andregot@gmail.com

PROFESSIONAL SUMMARY

Game Designer with 6+ years of professional experience designing gameplay, progression, meta and player-facing systems across live and in-development projects.

Experienced taking features from concept through prototyping, implementation, testing and iteration, with a Software Engineering background that helps bridge design and engineering.

Comfortable working across Unreal Engine, Unity and proprietary technology, with experience in systems design, technical design, R&D and cross-disciplinary development.

CORE COMPETENCIES

Gameplay & Systems Design • Progression & Meta Design • Combat Design • Quest & Content Design • Technical Design & Scripting • Rapid Prototyping & R&D • Unreal Engine & Blueprints Feature Ownership • Cross-Discipline Collaboration • Documentation • Leadership & Mentoring

PROFESSIONAL EXPERIENCE

MYTONA – Intermediate Game Designer / Deputy Producer / NZ Design Lead (2021–2026)

MYTONA – Junior Game Designer (2020–2021)

- Designed and owned gameplay, progression, meta, quest, technical and player-facing systems across multiple live and in-development projects.
- Took features from concept through documentation, prototyping, implementation, testing and iteration, creating specifications, gameplay flows and implementation plans for multidisciplinary teams.
- Worked closely with engineering, art, audio, QA and production, using a Software Engineering background to bridge creative and technical requirements and resolve implementation challenges.
- Worked extensively in R&D and rapid prototyping, developing and evaluating new mechanics, gameplay concepts and product ideas before production.
- Contributed to feature strategy and creative direction, aligning systems and content with player motivations, project goals and overall design pillars.
- Served as Deputy Producer, coordinating design, art and audio disciplines while supporting project planning and delivery.
- Led and mentored designers and interns, established the New Zealand design internship programme, and contributed to hiring, onboarding and team development.

Outfire — Live-Service Multiplayer Action Game

- Worked across gameplay, social, content and monetisation design on a competitive multiplayer hero shooter, including combat readability, player communication, quests, progression-facing content and social systems.

Hublix — Multiplayer Social Game, Mobile & PC Development

- Joined as the project's first Game Designer and worked across gameplay, 3Cs, level design, UI/UX, social and meta systems, leading early Unreal-based R&D and prototyping as the project moved into production.

Ravenhill — Mobile Live-Service Game

- Designed and refined live gameplay, event, social and meta systems, taking features through documentation, implementation, testing, polish and release.

VISTIC – Graduate Software Engineer (2019–2020)

- Developed, tested and maintained production C#/.NET software, building the programming and debugging foundation used in my technical game-design work.

SELECTED PROJECT EXPERIENCE

District Underground — Shipped University Game

Gameplay / Combat / AI Designer & Programmer | Unity / C# | PC

- Designed and implemented combat, enemy AI, boss behaviours and encounters for a released third-person hack-and-slash game, including animation integration, attack timing, hit feedback and combat feel.
- Built enemy decision-making using Behaviour Trees and a custom EQS-style spatial AI system; took the game through prototype, alpha/beta, gold and polish before releasing it on itch.io and showcasing it at Armageddon NZ.

Tracers — Independent Systems Design Project

- Designed and iterated an original competitive card game, using rapid physical prototyping and playtesting to develop interconnected resource, progression and player-interaction systems and improve clarity and gameplay flow.

SELECTED ACHIEVEMENTS

GameRefinery Mobile GameDev Awards 2022 — Feature Innovation Finalist • NZGDC Speaker • Pavs NZ Game Awards Judge

TOOLS & TECHNOLOGIES

ENGINE & SCRIPTING: Unreal Engine / Blueprints, Unity, Proprietary Engines, C, C++, C#, Lua, Python

DESIGN & DEVELOPMENT: Git/GitHub, Figma, Miro, Confluence, Jira, Adobe Suite

EDUCATION

Bachelor of Software Engineering — Game Development, Media Design School | A–

Diploma in Digital Creativity, Media Design School | Merit

IBM Data Science Professional Certificate
